DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claim 1, drawn to a copolymer of an N-acetylated derivative of poly(2-amino-2-deoxy-glucose).
- II. Claims 2-4, and 8, drawn to a composition comprising a copolymer and various peptides.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature (as defined in claim 1) is a copolymer "poly(2-amino-2-deoxy-glucose)". However, WO 96/39160 (SHALABY et al.) clearly teach the special technical feature in the title "Ionic molecular conjugates of N-acylated derivatives of poly(2-amino-2-deoxy-glucose) and polypeptides". Therefore, the special technical feature that links the inventions does not "define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art". Since no special technical feature exists, there is no Unity of Invention.

Election of Single Peptide

Additionally, Applicant is required to elect a single peptide as the peptide of the composition, if Group II is elected as the invention. The sequences range in amino acid residues, which would allow a coextensive search thereof. Thus, a separate and distinct search, as well as examination of each peptide sequence is required. **This requirement is not to be taken as an election of species, but rather as an election of a single invention, since each peptide is assumed to be patentably distinct invention, in the absence of evidence to the contrary.**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
